- Led a team of 15 members to support a struggling local community
- Coordinated planning, task delegation, and project execution

ACHIEVEMENTS

- Academic Excellence Award – High School Graduate
- Academic Excellence Award – Senior High School Graduate

III. Comparison

Criteria	LLM #1	LLM #2
Structure	Organized into sections (Education, Skills, Projects & Experience, Achievements). Uses bullet points for clarity but keeps descriptions minimal.	Similar structure with the same sections. Includes slightly more descriptive detail under Projects & Experience.
Clarity	Concise and straightforward. Each point is short, making it easy to scan quickly.	Clear but more elaborated. Provides context for roles (e.g., duties as Dental Assistant, Assistant Coach).
Formatting	Clean, modern text-based format. Simple bullet points and bold headers.	Dark-themed, visually polished format with bold headers and sub-bullets for responsibilities.
Overall Quality	Professional and suitable for entry-level applications. Best for text-only submissions (ATS-friendly).	More visually appealing and detailed. Stronger for human readers but may be less ATS-optimized.

IV. Reflection

Between the two résumé drafts, **LLM #2 performed slightly better overall** because it provided a more polished and visually appealing format. It included descriptive details under the “Projects & Experience” section, which gave recruiters a clearer sense of responsibilities and impact. In contrast, **LLM #1 was more concise and ATS-friendly**, making it suitable for online submissions where automated systems scan for keywords.

The key differences I observed were in **structure and clarity**. Both resumes followed the same section order, but LLM #2 expanded on experiences with sub-bullets, while LLM #1 kept everything brief. Formatting was another distinction: LLM #1 used a simple text-based style, while LLM #2 adopted a modern dark-themed design that stood out visually. Overall quality leaned toward LLM #2 for human readability, but LLM #1 had the advantage of being optimized for applicant tracking systems.

In my final resume, I combined the strengths of both. I kept the **clean structure and ATS-friendly formatting** from LLM #1 while integrating **select descriptive details** from LLM #2 to highlight responsibilities and achievements. This balance ensures the resume is both machine-readable and engaging for recruiters.

Through this process, I learned that **prompting plays a crucial role in shaping outputs**. Clear, specific instructions lead to resumes that match professional standards, while vague prompts result in overly generic drafts. By refining prompts—such as specifying “entry-level, concise, modern format”—I was able to guide the models toward producing more useful results. Ultimately, effective prompting is about knowing the audience and tailoring instructions to achieve the right balance of clarity, detail, and presentation.

V. FINAL RESUME OUTPUT:

LANCE MALINIS DELGADO
